"No matter how high of an IQ you might have or how fast you can text, you will be interested in reading the NG1 trilogy and might not be able to stop yourself from reading it twice! And the books don't have one word that I needed to look up in the dictionary for what it meant!" Einstein's ghost. "I like the booms in the books as well. As awesome as the first nuclear bomb and just as original!"

"After reading the NG1 trilogy you are bound to wonder why you thought the battle scenes of star wars were so good, to wonder why you thought star gate was so interesting, to think all of the other sci-fi movies are dinosaurs!" Mike from Anaheim. "No where else can you get something written like this! The NG1 trilogy makes you think as much as if you read about some magic or all powerful force or of talking goblins, but none of that is in it!"

"This NG1 trilogy has adventure, political intrigue and the best battles ever written! The speech given by the battle hardened Governor, you just can tell it is coming from his heart, to his men who needed something right before their most important battle, brought a tear to my eye! What the lone Governor said in the face of his enemy, who were saying something much the opposite, changed my life forever! His words were the most important words, personally, to me, that I have ever read!" M. McCloskey
